Extremely useful explanation of the power of neuratives. Interesting point to consider that BLUT is not useful for serior leaders. I much more approciated and stayall interested in this brief them Others who focused on wordy power points. Operational examples are the Most useful way that I learn a concept, which are stories. Concepts don't have meaning without context. That you for teaching me samething extremely valuable.

Awesome! I would have liked more time with him and get a deeper dive on how to create stories.

More time for questions would be very helpful.

Gentatic brief and very education expectables as we consider leadership and unpart ful ways to communicate

Retain.

Amazing! Peter Singer forces us to tunk differently. Amays bring him and his ideas to This course. Awesome brut wit how to present data based on target andsance and understand what message you want the audience to receive through narrative and storytilling: Phenomenal! I recommend moving Dr. Singere to the beginning of the week if possible. His use of narrative is a basiline for OIE (or a significant part of it.)

Executor Presontation, Voly important supplient to the Program as DRS, NGCL DECEMBES WHAT WE are DOING WANG

- FANTASTIC SUBSION.
- HOLPFUL DISCUSSION ON HOW TO IMPROVE
OVE MESSTAGING.

Great - were true

- THIS IS A COURSE HUNKSCOH!

Creat Presentation.
